ATHLETIC HEALTH CARE SPECIALIZATION (15 hours):

This specialization is ideal for anyone interested in Athletic Training*, Sports Medicine, Physical Therapy, Physician Assistant, Chiropractic, or any other allied health profession at a graduate level.

Description:
This specialization includes courses specific to the prevention, evaluation, and management of injuries sustained by athletes and the physically active population. It will prepare students to go on to graduate programs with a better understanding of the human body and injuries sustained during physical activity and sport.

*Completion of this specialization will not qualify a student to sit for the Board of Certification examination nor the Texas Athletic Trainer Licensure examination for athletic trainers. If you are interested in becoming an Athletic Trainer, please see the information on the Athletic Training Program

Courses:
KIN 312 Care & Prevention of Athletic Injuries
KIN 342 Clinical Evaluation of Athletic Injuries – Lower Body (Sp)
KIN 343 Clinical Evaluation of Athletic Injuries – Upper Body (Sp)
KIN 344 Therapeutic Exercise & Rehabilitation – Lower Body (F)
KIN 344U Therapeutic Exercise & Rehabilitation – Upper Body (F)
